

# A New Public Water District What It Means for YOU:

# Water Quality & Service

---

GOALS OF A NEW DISTRICT: **WATER QUALITY & SERVICE** | REGIONAL COLLABORATION |  
WATER GOVERNANCE & ACCESSIBILITY | COST SAVINGS & RATES | RATEPAYER ADVOCACY

Legislation is being pursued to bring these benefits to the Santa Clarita Valley. To read the bill (SB 634-Wilk) and express your opinion, visit [www.YourSCVWater.com](http://www.YourSCVWater.com)

27234 Bouquet Canyon Road  
Santa Clarita, California 91350

## “Soft Water”

A new district would be able to blend regional water supplies, which include softer imported water and harder groundwater. This would help minimize a nuisance many in our region experience: “hard” water.

---

## Customer Service

Residents can expect their customer service to remain unchanged for the foreseeable future. Calling district staff, paying bills, or questions on service/billings will remain unchanged.

Over time, enhancements to customer service are expected.

---

## Key Water Quality Benefits

*Integrate systems to create even better water quality & service*

*Reduce “hard water” nuisance by blending regional supplies*

*Implement any customer service changes slowly & incrementally*
