

A New Public Water District What It Means for YOU:

Regional Collaboration

GOALS OF A NEW DISTRICT: WATER QUALITY & SERVICE | **REGIONAL COLLABORATION**
WATER GOVERNANCE & ACCESSIBILITY | COST SAVINGS & RATES | RATEPAYER ADVOCACY

Legislation is being pursued to bring these benefits to the Santa Clarita Valley. To read the bill (SB 634-Wilk) and express your opinion, visit www.YourSCVWater.com

27234 Bouquet Canyon Road
Santa Clarita, California 91350

The Valley is served by a patchwork of five separate water providers – some with boundaries 100 years old.

The new district would unify efforts to provide drought protection, develop new sources of water, enhance fire protection and improve groundwater management.

A new district also meet State demands to work more closely as a region.

Working together on water issues is critical for our region. A new district puts on the path towards collaboration.

Key Regional Collaboration Benefits

Work as a region, not in siloes

Develop projects & new water sources together, not separate districts

Meet state demands to regionalize water management
