

A New Public Water District What It Means for YOU:

Cost Savings & Rates

GOALS OF A NEW DISTRICT: WATER QUALITY & SERVICE | REGIONAL COLLABORATION |
WATER GOVERNANCE & ACCESSIBILITY | **COST SAVINGS & RATES** | RATEPAYER ADVOCACY

Legislation is being pursued to bring these benefits to the Santa Clarita Valley. To read the bill (SB 634-Wilk) and express your opinion, visit www.YourSCVWater.com

27234 Bouquet Canyon Road
Santa Clarita, California 91350

The new district would save upwards of \$14 million in its first 10 years. These savings would help stabilize rates by partially offsetting impacts caused by inflation or external forces, rebuild aging infrastructure and invest in greater water reliability. Savings would be achieved by eliminating outside costs and redundancies, while reducing internal operations (via attrition) without impacting customer service.

Key Economic Benefits

Stabilize regional water rates

Reinvest in aging infrastructure

Combine redundant systems, like IT

Eliminate redundant services & real estate
