

High Efficiency Sprinkler Nozzle Rebate Program

Newhall County Water District is offering to all Single Family Residential customers a rebate to replace your high water sprinkler nozzles to a more efficient sprinkler nozzle. The amount of your rebate is contingent on the nozzles purchased.

What are the benefits of installing water-efficient sprinkler nozzles?

Water-efficient sprinkler nozzles apply water more evenly and slower than conventional spray nozzles, allowing the water to soak into the ground thus saving water and reducing the amount of run-off. Using pop-up sprinkler spray heads with new water-efficient nozzles can save more than 6,600 gallons of water per nozzle over a 5-year period.

What sprinkler nozzles qualify for a rebate?

Only qualifying water efficient sprinkler nozzles must be used.

How much is the rebate?

Level 1 Nozzles: \$150 - Here's a list of qualifying water efficient [spray nozzles](#).

Level 2 Rotator Nozzles: \$300 - Here's a list of qualifying water efficient [rotator nozzles](#).

What do I need to do to receive a rebate?

Complete the Sprinkler Nozzles Rebate Application, attach copies of the dated sales receipt(s), and mail or email to:

Mail: Newhall County Water District
